

# Creepy crawlers

June 7, 2011

## DESCRIPTION OF ACTIVITIES:

We had lots of fun on our creepy crawlers hunt in our soil table today, with their finger light. As you can tell in our picture the kids had a wonderful time being (arraigner) "spiders" making their spider webs. Crawling under and going over; it was their favourite activity of the day. We also used potatoes to make our (coccinelle) "lady bug" by painting with paintbrushes and using our fingers to make our lady bug dots. They had two table tops activities like a memory game and where's that bug? And I want to thank Aidan for his lovely book " Eency Weency Spider".

## OUTCOMES:

- Gross\fine motor skills - using fingers to grab bugs, crawling under and over to make a spider web
- Literacy- Reading Aidan's book with our little spider.
- Math- Matching game, where's that bug, lady bug counting game

- We practice our patience while waiting our turn to play an activity.
- They also learned different words today .. ( Je m'appelle ..... "my name is.....", pareille "same", araigner "spider", coccinelle " lady bug"
- Textures and science- while exploring in the soil.
